2.0 Document Revision History

Version Control Note: All documents in development are indicated by minor versions i.e. 0.1; 0.2 etc. The first version of a document to be approved for release is given major version 1.0. Upon review the first version of a revised document is given the designation 1.1, the second 1.2 etc. until the revised version is approved, whereupon it becomes version 2.0. The system continues in numerical order each time a document is reviewed and approved.

4.0 Introduction

Current international public health activity is aimed at reducing the spread of the currently circulating novel coronavirus, which causes COVID-19 infection. This coronavirus is a novel agent whereby there is no immunity in the world's population to the infection. The two main methods of preventing the spread of infection are hygiene measures and social distancing.

This risk assessment has been produced to identify all controls in place at Winn Group to manage the risks, in as far as is reasonably practical, presented by COVID-19.

Control measures specified to reduce risk are based on current guidance from the UK Government.

5.0 Objectives, Aim & Scope

5.1 Objectives

This risk assessment affirms Winn Group's commitment to have in place control measures that ensure that Winn Group employees can go about their duties in a safe and secure environment.

5.2 Aim

The aim of this document is to define the requirements for physical and environmental controls that will be applied to mitigate the risks presented by COVID-19 in the workplace.

5.3 Scope

This policy applies to

- All employees of Winn Group and associated subsidiaries, contractors, volunteers, vendors and partners;
- All Winn Group premises.

6.0 Risk Ratings

Risk ratings are calculated by considering the likelihood of an event occurring in conjunction with the Consequence should that event occur.

6.1 Determine The Magnitude Of Risk

Magnitude of risk is calculated as **Likelihood + Consequence** where:

Likelihood	Description
5	Almost Certain
4	Likely
3	Possible
2	Unlikely
1	Rare

Consequence	Description
5	Catastrophic
4	Major
3	Moderate
2	Minor
1	Insignificant

6.2 Risk Score Matrix

Winn Group utilise the following risk score matrix to determine the risk rating (the magnitude of risk):

		Consequence					
		Insignificant	Minor	Moderate	Major	Catastrophic	
		1	2	3	4	5	
Likelihood	Almost Certain	5	6	7	8	9	10
	Likely	4	5	6	7	8	9
	Possible	3	4	5	6	7	8
	Unlikely	2	3	4	5	6	7
	Rare	1	2	3	4	5	6

6.3 Risk Rating

Once the Risk rating is determined the following actions are required to address the risk:

Rating	Risk Category	Description
2 – 4	Low Risk	Manage risk with routine procedures
5	Medium Risk	Specific Manager responsibility to reduce risk
6 – 7	High Risk	Requires Senior Management attention to plan to reduce the risk
8 – 10	Extreme Risk	Detailed action plan required to reduce the risk immediately

7.0 COVID-19 – Risk Register

Key: L – Likelihood; C – Consequence; R – Risk Rating.

Risk Title	Risk Description	Risk Owner	Date Raised	Inherent Risk			Mitigating Controls Implemented	Residual Risk			Date Closed
